

# **PRAVIK MINERALS LTD.**

**(An ISO 9001:2008 Certified Co.)**

Manufacturer & Exporter of Oil Drilling Minerals like  
Mica Flakes, Quick Seal, Calcium Carbonate, Walnut  
Shell and many more

# ABOUT US

## Company Profile

We are major business force manufacturing and exporting a qualitative range of industrial minerals such as Mica Flakes, Quick Seal, Calcium Carbonate, Walnut Shell, Silica Flour, Lost Circulation Material (LCM), Hematite, Quartz, Potash Feldspar, Soda Feldspar, China Clay, Kaolin, Dolomite, Limestone etc. Our business operations have judge the requirements of our clients and our established vendors have provided their excellent support by providing industrial minerals as per the requirements of our clients.

We make you sure that we deliver these mineral products as per clients requirements. Besides, we pay full attention towards quality and we assure timely delivery. Trusting over our expertise, we are now able to fulfil our motto of client satisfaction by exporting and manufacturing our range of industrial minerals in bulk amount round the year. By growing steadily, we have become the most preferred industrial minerals manufacturer and exporter in India.

## Clients

We reach to provide our customers with high quality goods at reasonable prices. We respect our client's views & put the same into practice to acquire higher levels of excellence and perfection. We have been exporting our exclusive industrial minerals all around the world to many renowned companies in Iran, Middle East and Gulf Countries.

## Quality

Being a quality oriented company, we go through the attainment of offering quality minerals. At our quality department, we have all the requisite tools, equipment, and technologies to helps us ascertain the quality of the minerals. Further, we put utmost care and commit that our production process right from checking of raw material until the final shipment of our consignments confirm to industrial standards norms.

As such, our range passes through various quality parameters such as:

- Purity
- Accurate Composition
- Minerals Content

# PRODUCTS

## Mica Flakes

We deal in manufacturing mica flakes in a variety of particle sizes. Our mica flakes are fabricated of superior quality which are availed in variety of applications. There also exist small sized of mica flakes which are needed for roofing felt industries, decorative purpose & mica board manufacturing.

Mica flakes manufacturers fabricate these to split the wall of houses for preventing noise, heat & ultra violet rays, oil drilling machinery etc. In addition, we are highly reckoned manufacturer and exporter of mica flakes in India.

## Quick Seal

Quick Seal) is a high-temperature softening and coarsely-ground modified hydrocarbon for loss-of-circulation material. These are used in oil-base mud systems. These are also water-insoluble, ultra-fine, complexed cellulose materials which are suitable for managing seepage and loss of circulation while drilling through consumed or under-pressured zones.

## Calcium Carbonate

We are engaged in providing calcium carbonate which are used in various industries such as plastic, paper, rubber, paint, pharmaceutical and many more. Calcium carbonate is a common substance which are found in the form of rock. Its chemical formula is  $\text{CaCO}_3$ .

## Silica Flour

Silica Flour is a powdered sand that helps oil well cement maintain low permeability and high compressive strength under high-temperature conditions.

## Walnut Shell

Walnut ground shells are used to help combat lost circulation in water-based and non-aqueous fluids.

Walnut Shell is available in three grades: fine, medium, and coarse. All three grades may be used in pills for spotting opposite thief zones and in high filtration squeeze slurries.

Walnut Shell can be used in the active mud system to help prevent lost returns.

## Hematite

Hematite is weighting material used to increase the density of drilling fluids to control formation pressures. It has a specific gravity of 4.8 and can be used to increase the density in oil and water-based drilling fluids. It has a higher specific gravity than barite, and so requires less total product to achieve the same fluid density.

## Fibro-Seal

Fibro-Seal is a natural cellulose fiber that can be used effectively in spot pills, sweeps and maintenance treatments with minimal adverse effect on rheology and filtration control properties. The cellulosic material helps decrease the permeability of the wall-cake in all drilling fluid types.

Fibro-Seal additions do not interfere with pumping equipment or downhole tools when used in the proper concentration ranges. These materials are compatible with water and non-aqueous based fluids.

## List of other Products

- Quartz
- Feldspar
- Kaolin
- Limestone
- Dolomite
- Barytes
- Bentonite
- Lime

## ISO 9001:2008 Certification

### *Certificate of Registration*

Awarded to

**PRAVIK MINERALS LTD.**

629, SECTOR - II, HIRAN MAGRI, BEHIND ALOK SCHOOL,  
UDAIPUR - 313602, RAJASTHAN, INDIA

It is Certified that Quality Management System of Organization has  
been audited and found to be in accordance with the requirements of

**ISO 9001:2008**

For the Scope of activities described below:

MANUFACTURER & EXPORTER OF OILFIELD CHEMICALS & MINERALS  
(MICA FLAKES, QUICK SEAL, CALCIUM CARBONATE, WALNUT SHELL,  
QUARTZ, FELDSPAR, DOLOMITE, SILICA FLOUR AND OTHER RELATED PRODUCTS)

Certification No : 1314QU16

Initial Registration Date : 17.04.2014

Date of Expiry : 16.04.2015

Recertification Date : 17.04.2017

Issuance Date : 17.04.2014

  
Managing Director

ROHS Certification Pvt. Ltd.

Approved For: DGCI, Accreditation Council (DAC), Ministry of International Cooperation, New Delhi
